FOR IMMEDIATE RELEASE

EDOCS-EXPRESS AND PRESCIENT SOFTWARE ASSIST OHIO STARTUP BANK!

March 15, 2006. Vancouver, WA. eDocs-Express is proud to announce that **Insight Bank**, an Ohio bank in organization, is a new client!

Mark Kelly, former President and CEO of Consumers National Bank, past President of the Ohio Community Bankers Association and former Director of the Cincinnati Federal Home Loan Bank, is leading the charge in the formation of Insight Bank, a new commercial bank in Columbus, Ohio.

In building this new bank, Mark is relying upon his 30 plus years in banking and the many relationships he has established and maintained. One of these strong relationships is with Bob Jett, the primary developer of Laser Pro Lending and a founder of eDocs-Express. Mark comments,

“Bob and I have known each other for many years, ever since I first visited the Laser Pro folks in Portland, Oregon. Whenever I needed counsel on some new technology or other banking issue, I often consulted Bob and his folks. Bob and I kept in touch after I left my former bank to begin the formation of Insight Bank.”

“Knowing Bob and Loren Wilson, General Manager of eDocs-Express, I was intrigued by the possibility of using eDocs-Express for our loan documentation needs until we build up sufficient loan volume to justify bringing that function in-house. And even then, I’ll be surprised if we don’t keep using eDocs-Express for backup purposes, as well as documenting our more complicated loans.

I’m also excited about the technology Bob’s company is bringing us. Prescient Software is building for us a private Intranet communications system so that we can conduct online meetings for management and credit meetings. Many of our bank directors travel considerably or are devoting the majority of their time to their own businesses. Utilizing their valuable time in the most efficient manner is a priority for us. This new communications system, which ties into the eDocs-Express Loan Processing Center, will enable us to communicate on a real-time basis without having the risk and expense of distributing packages of documents.

“It is exciting to start a new bank with a clean slate and to take advantage of my relationships that have helped me succeed in the past.”

Insight Bank has licensed LaserPro Lending®, a service of Harland Financial Solutions, for use by eDocs-Express in documenting loans for Insight Bank.

eDocs-Express is a combination of the resources and capabilities of three proven industry leaders, Prescient Software, J.R. Bruno and Associates and West One Financial Group. Prescient Software specializes in the application of software and Internet technologies to real world business operations. J.R. Bruno and Associates assists banks with every aspect of the SBA loan process. West One provides integrated services to the non-bank lending industry,
